Do you support our preferred option?	No
Do you prefer one of the other options?	Fully owned and managed by Rangitāne o Manawātū
Tell us more	I support Rangitane o Manawatu to own, fund and manage it. This will spare council to spend money on it which could be spent on other projects e.g. Water, Sewage and Roads.

Tell us more	You are asking for options on a project the ratepayers haven't approved. You need to ask them first if they want this. You will probably find that if you have so much money to spend, they would prefer a reduction in rates. Furthermore, council needs to spend more money in taking proper care of the waterways running through Palmerston North.

Tell us more	I support this passion project in theory however I do not believe this is the best use of funds for the current climate I think it is ignorant of the council to allow such projects to be forefront in such a bleak financial time for many families. I believe this will cause further divide within the community. A community that is already suffering and in strife with such a high crime rate already.

Tell us more	I think this is a misuse of ratepayer money. This money should be used for core business activities of council like water and roading in this challenging fiscal environment

Tell us more	With the cost of living, cutting nice to have's and focusing on maintenance and basic services seems more sensible unless it's clear the project will bring in more money than it costs, Especially with the water rates increase incoming, if skipping this could save some money it would lessen the impact of the water rates increase

Tell us more	Or managed by te manawa. Setting up a new organisation takes time and money, as you've noted with your preferred option. I think it would be smarter and more economical to have this new space managed by the council/te manawa to ensure it remains accessible for all and to keep consistency with other council initiatives.

Tell us more	I don't believe this spending is an appropriate use of the funds available when we have pressure in our water and other basic services. I accept that it was agreed in the long term plan but council should be reacting to the current climate and focusing on the pain areas in the city rather than the flashy new stuff that will be under utilized
