

CAUTION WHEN SWIMMING

Rivers are powerful, unpredictable and change quickly.

Rivers are deeper and swifter than they appear.

Never enter the water alone.

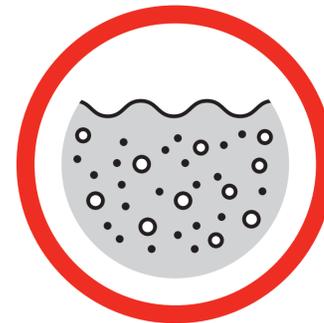

If you are not a strong swimmer or in doubt, stay out.

Children must be supervised within arm's length by a strong swimmer at ALL times.

Check for hazards where you swim and downstream such as rapids, submerged rocks, large logs, unstable cliff faces, boats and jet skis.

Check the water is clear. Don't enter if the water smells or is an odd colour.

Wait 72 hours after heavy or prolonged rainfall.

IN AN EMERGENCY, CALL 111
