Proposed Plan Change D: Pressure Sewer Systems

What is this all about?
Proposed Plan Change D (PCD) aims to review the District Plan to allow for pressure sewer systems to be installed in identified areas within the urban area of the City. It will also allow for the systems to be installed where it is considered appropriate outside of these identified areas.

What is a pressure sewer system?
A sewer system where sewage is conveyed under pressure generated by multiple pump units, each located on an identified private property, to a shared pressure main.

Proposed Changes
- New Resource Management Issue inserted into the District Plan referring to pressure sewer systems
- A change to existing Policy 2.7 of the District Plan to outline the use of pressure sewer systems, and the introduction of consent notices to be used in relation to properties that have pressure sewer system
- A change to the the existing essential services standard to include reference to pressure sewer systems in pressure sewer areas.
